West Pennant Hills

### WHAT IS FACIAL REJUVENATION MASSAGE?

Facial rejuvenation massage is a specialised technique involving deep manual manipulation of facial muscles, ligaments, tendons, subcutaneous fat, and fascia.

By working with these tissues, facial rejuvenation massage aims to improve blood flow, activate lymphatic drainage, and rejuvenate the face.

It is a non-invasive technique

# KEY BENEFITS

## Non-invasive

Facial rejuvenation massage does not harm skin and facial tissues. It is a natural alternative to plastic surgery, microneedling, and injections of botulinum toxin and fillers.

## Diagnostics as a key element

Diagnostics of the facial tissues is the essential element. Your treatments will be tailored to focus on your specific age-related facial changes.

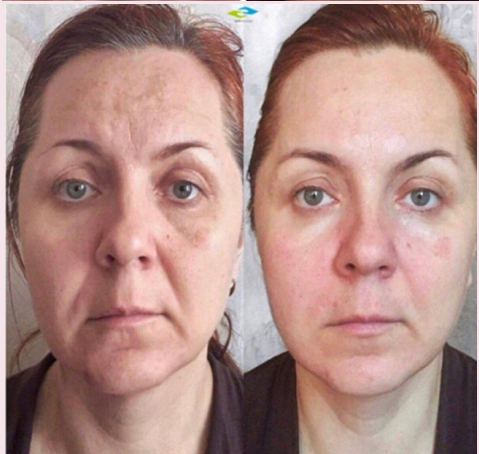

## Attention to root causes

Deep work with the root causes of age-related problems helps reduce wrinkles and puffiness, improve muscle tone, hydro balance, tissue elasticity and even production of skin collagen and elastin.

## Healing effect

Tension release in the face, neck and upper back muscles restores blood and lymph circulation in nearby vessels. As a result, cells of the face and brain are saturated with oxygen and nutrients, eliminating of carbon dioxide and toxins.

# BEFORE & AFTER

# HOW MANY SESSIONS WILL I NEED?

Everyone is different, but as a general guideline:

For the best results and long-lasting effects

6-10 treatments — once a week

To maintain the results after a complete course

1 treatment per month
