Designed in Australia and manufactured in the USA., Osk Pulse is registered with the FDA as a Class 1 Medical Device.

Oska Pulse — GETS TO THE ROOT CAUSE OF YOUR PAIN

What is an **Oska Pulse**?

The **Oska Pulse** is FDA registered as a Class 1 medical device, for the management of a large range of musculoskeletal conditions, including osteoarthritis. With no leads or pads to attach, it is entirely portable and easy to use.

What does the **Oska Pulse** do?

Oska Pulse helps reduce or eliminate pain and inflammation, speeding recovery of musculoskeletal injuries. By using modulated, non-invasive electromagnetic energy fields, the Oska Pulse mimics dynamic loading of cells naturally induced during exercise, but without the risk of re-injury or corresponding wear and tear.

How does the **Oska Pulse** work?

Oska Pulse simulates exercise at the cellular level, without any sensation of vibrations or pulses by the user.

(08) 9272 5220

The **Oska Pulse** is setting a new standard in the rehabilitation & maintenance of musculoskeletal & soft tissue conditions such as injury recovery, joint stiffness & pain.

Portable and so easy to use:

1. Slip **Oska Pulse** into the elastic strap provided.
2. Attach to the appropriate area being treated.
3. Press the start button.

Each treatment lasts for 30 minutes and will switch off automatically.

Environmentally friendly— No further expenses

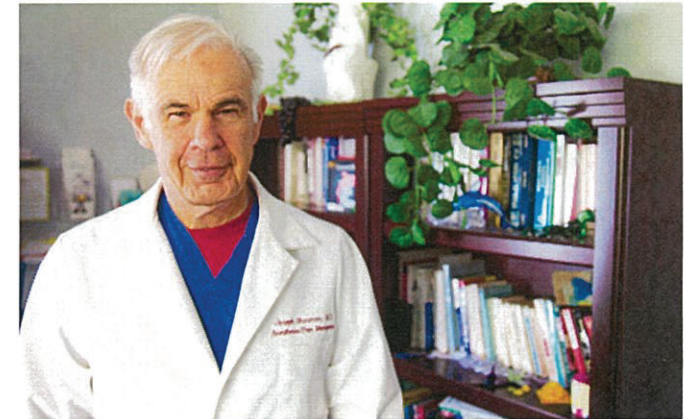

With no wires, pads or other restrictions you can enjoy everyday activities uninhibited.

DRUG FREE PAIN & INJURY MANAGEMENT

- A family medical tool suitable for all ages.
- Kick starts the repair processes.
- Accelerates natural healing.
- Reduces recovery time.
- Improves joint stability and flexibility.
- Totally portable — Use anywhere!

"Pain management is about easing the suffering and improving well being, quality of life and function. As a physician, I am constantly trying non-invasive, drug free management solutions. I like the fact that the **Oska Pulse** is easy to use and has no known side effects. I am recommending the Oska Pulse to some of my patients. I believe it can offer general relief and well being to many pain sufferers."

Dr Joseph Shurman, MD. Scientific Advisory Board, Oska Wellness. Pain Specialist & Chairman Scripps Memorial Hospital, San Diego USA.

International Physiotherapist Endorsement

In my 40 years of clinical experience I've never had such a useful and easy to use device to accelerate the healing of both chronic and acute musculoskeletal conditions. I fractured both my legs; the orthopaedic surgeon was impressed with how quickly they healed.
